Sponsor and Exhibitor Opportunities.-Michael Berry

One of the ways by which the Southeast American College of Sports Medicine defrays the cost of the annual meeting is through the use of sponsors and exhibitors at the meeting. The chapter offers a variety of opportunities to companies and organizations to market their products and services to sports medicine and exercise science professionals in the southeast and to gain local, regional and national exposure for their company. One of the highlights of the conference is the exhibitors' that participate in the meeting. The participants have the opportunity for one-on-one contact with the exhibitors to learn more about the products and services they have to offer. The sponsors and exhibitors that participate at the annual meeting are from a wide variety of industries that offer products, equipment or services that the conference attendees use frequently in their professions. Last year was a record breaking year for SEACSM in terms of attendance and participation of exhibitors. In fact, all our exhibitor spaces were occupied. If you or your business would like to participate as a sponsor or exhibitor, or if you know of a company or business that you think would like to participate, please contact Michael Berry (berry@wfu.edu) as soon as possible to discuss these opportunities.

2011 Annual Meeting Preview

SEACSM Members:

We are very excited about the SEACSM program for this year's meeting in Greenville South Carolina on February 3rd-5th, 2011. The program has expanded from 164 abstracts accepted last year to 212 for our upcoming meetings. The success of this region and the meeting program is directly attributed to our active membership. This program will feature 10 symposiums, 15 tutorials, 37 oral presentations, and 142 posters including 24 student award finalists in three categories: Undergraduate, masters, and doctoral.

The invited speakers include: Dr. Scott Powers (Keynote lecture: Exercise can Protect against a Broken Heart); Dr. Thomas Best (President's Lecture: The Immune Response: Friend or Foe?); Dr. Steven Blair (Montoye Scholar Lecture: Physical Inactivity: The Biggest Public Health Problem of the 21st Century); Dr. Lichtman (Basic Science Lecture: Imaging the Neuromuscular System); and Dr. Brent Ruby (Luncheon Lecture: Quantifying the Limits of Human Performance Outside of the Laboratory).

In addition, students from various institutions will be competing and demonstrating their academic prowess in the jeopardy style Student Bowl. Make sure your teams sign up early to represent your school. There will be a Graduate Fair to learn about future career opportunities. Schools should be aware that there are early registration incentives.

On Thursday Night there will be the Social to meet with friends and network. At the meeting, we also have exhibitors that will promote and demonstrate their latest equipment, software, and supplies. There is a very active schedule program planned for the 2011 meeting. Please see the PROGRAM AT A GLANCE.

Last year had over 750 attendees and more are expected this year. This means that you should register early and finalize your hotel arrangements. Greenville is centrally located within our region and features a river park a couple blocks from the convention center for exercise and leisure, a variety of restaurants and pubs. The conference hotel is the Hyatt Regency in downtown Greenville, SC. Hotel information can be found at (www.greenville.hyatt.com) or links on the SEACSM web site. 2010 SEACSM Fall Lecture Tour

The **2010 SEACSM Fall Lecture Tour** was coordinated by, Dr. Jay Garner from The University of Mississippi. The Fall SEACSM Lecture Tour was delivered by Dr. Duane Knudson-Texas State University. The title of the lecture was:

"Disfunctional Anatomy: Why Biomechanics is Essential." By all accounts, the SEACSM Fall Lecture Series was a success at all locations. Dr. Duane Knudson visited University of Louisiana-Monroe (Lisa Colvin), Murray State University (Jeremy Erdmann), Mississippi State University (Brendon Hale), University of Mississippi (Jay Garner), and University of Tennessee (Clare Milner). The lecture settings were varied ranging from full university wide auditorium of 500 attendees to a more intimate graduate student lunch setting of 15. The representative from each of the universities reported that Dr. Knudson was a very energetic and entertaining speaker that revealed a new side of kinesiology, especially mechanics. There are some pictures that Dr. Colvin from ULM posted (<http://www.facebook.com/album.php?aid=46120&id=153851914630859>).
